PROFESSIONAL SUMMARY

Information Technology graduate with hands-on experience in Advanced Excel, SQL, Python, and Power BI, skilled in data cleaning, validation, exploratory analysis, and building interactive visualizations and reports that surface business insights. Completed end-to-end analytics projects involving data preprocessing, SQL analysis, and DAX to derive meaningful insights. Seeking to apply analytical and problem-solving skills to transform data into actionable business decisions.

TECHNICAL SKILLS

Data Analytics
Advanced Excel (Pivot Tables, VLOOKUP, XLOOKUP, Index-Match, Power Query, Dashboards, Lookups), SQL (Queries, Joins, Aggregations, Subqueries, Stored Procedures, Triggers), Python (Pandas, NumPy), Power BI, Data Cleaning, Data Transformation, Data Validation, Exploratory Data Analysis (EDA),Data Visualization, Data Reporting

Languages: Python, Java (OOPs), Php
Developer Tools: Jira (Basic), Git & GitHub, XAMPP
Soft and Communication Skills: Public Speaking, Team Collaboration, Leadership, Time Management, Problem Solving, Adaptability, Client Communication, Presentation Skills, Active Listening

EXPERIENCE

Data Analyst Intern July–Sep 2026
Xipra Technology
- Cleaned, transformed, and validated business datasets using Python, Excel, and SQL to ensure data quality for analysis and reporting.
- Developed interactive Power BI dashboards and Excel reports to track KPIs and communicate business insights.
- Analyzed datasets to identify trends and resolve inconsistencies, producing findings that supported data-driven decisions.

Web Development Intern Jan–June 2026
Azentra Technologies Private Limited
- Developed and maintained an e-commerce website as part of real-world web development projects.
- Optimized website speed, SEO, and user experience.
- Worked with databases and development tools to support website functionality and maintenance.

EDUCATION

U V Patel College Engineering, Ganpat 2022–2026
B.Tech - Information Technology – **8.16 CGPA**

N & K Pandya Himat High School No-2 2021–2022
Higher Secondary School

PROJECTS

E-Commerce Sales & Performance Analytics
Python, SQL, Power BI, Excel

- Built an end-to-end analytics pipeline from raw Excel data to an interactive Power BI dashboard.
- Preprocessed data using Python (Pandas, NumPy), handling missing values, duplicates, validation

- And type conversions to prepare datasets for analysis.
- Performed SQL analysis in MySQL using joins, aggregations, and subqueries to derive business-focused metrics.
- Created DAX measures and Power BI visualizations to uncover KPIs, sales trends and customer behavior for decision-making.

Customer Churn & Retention Analytics

Power BI, Power Query, DAX, Excel

- Analyzed thousands of customer records to identify churn patterns, retention trends, and high-risk customer segments.
- Cleaned and transformed customer data using Power Query, handling data quality issues and preparing it for analysis.
- Developed DAX measures and calculated columns to track churn rate, customer KPIs, tenure, and monthly charge metrics.
- Built an interactive Power BI dashboard to analyze churn by contract, tenure, services, and customer risk, generating retention-focused insights.

CERTIFICATIONS

- Data Analytics Essentials **- Cisco**
- Web Development Internship **- Azentra Technology**
- Introduction to Tableau **- Simplilearn**
- Generative AI Fundamentals - **Google Cloud**
- Digital Productivity - **NIT Foundation**
